Telson Resources Inc.

Developing gold, silver and base metals in Mexico's prolific Sierra Madre mineral belt

Legal Disclaimer

This presentation may contain forward looking statements including but not limited to comments regarding the timing and content of upcoming work programs, geological interpretations, receipt of property titles, potential mineral recovery processes, etc. Forward looking statements address future events and conditions and therefore involve inherent risks and uncertainties. Actual results may differ materially from those currently anticipated in such statements. Telson Resources Inc. relies upon litigation protection for forward-looking statements.

Company Introduction

TELSON RESOURCES INC.

- Canadian-based resource exploration and development company currently focused on its flagship projects in Mexico's prolific Sierra Madre mineral belt

TAHUEHUETO PROJECT

- Advanced project covering a 9,081 hectare property in Durango Mexico
  - 878,878 AuEq (Gold Equivalent Ounces, Au&Ag only) with 665,000 oz Gold and 13.2 million oz Silver, plus significant base metals adding value to the resource
  - 60% of the 878,878 AuEq is "measured & indicated"
  - 1,654,411 AuEq (all metals, Au, Ag, Cu, Pb, Zn)

Calculated using metal prices as of November 13, 2013

Key Management and Directors

Ralph Shearing, Professional Geologist (P.Geo), President/CEO

- 30 years experience in mineral exploration & development.
- Experienced in all aspects of mineral exploration, including geophysics, geochemistry, geology and diamond core drilling.
- 25 years senior management experience with publicly listed companies

John Lynch, Director

- Extensive experience in corporate management and administration as well as experience in corporate governance.
- Currently President & CEO and a director of NWT Uranium Corp., a TSX Venture Exchange listed company
- Serves on the Board of Directors of URU Metals Limited

Lianxi Zhang, B.Sc Chemical Eng., Director

- Served as Department and General Manager for Tangshan XinGuang Ltd a developer of coal mines in the North Eastern part of China.
- Founder Tianjin LanDe Investment Co. Ltd. (“Tianjin”), involved in coal mine development, real estate development and direct equity investments in a number of domestic and foreign companies.
- Tianjin is one of the most recognizable investment holding companies in Tianjin City, China investing in Chinese real estate, private companies in China and international publicly traded companies.

Directors

Yao Sun, B.Comm, CFA, CMA,CPA, Director

- Active member of the Chartered Financial Analyst Institute (CFA), the Certified Management Accountants (CMA) of Canada and the Certified Practicing Accountants (CPA) of Australia.
- Former financial analyst with Citic Media Group in Beijing, China.
- Currently CEO of Clearstone Capital Corp, a Canadian company which provides advisory services to Canadian and Chinese public companies.

John Anderson, B.A., Director

- Over 20 years experience in the financing and promotion of small to mid-cap public companies.
- President of Purple Fish Capital Management, a private equity firm engaged in the financing of both private and public companies in North America, Europe and Asia.
- Director on the boards of other junior resource companies.
- Mr. Anderson holds a B.A. from the University of Western Ontario.

Don Crossley, CA, Chief Financial Officer

- More than 25 years of experience as a Chartered Accountant, including seven years with KPMG.
- During the past 18 years, he has also served as a director and officer of several public companies.
- Over 23 years providing a full range of accounting services to publicly listed Canadian companies.

WHY MEXICO?

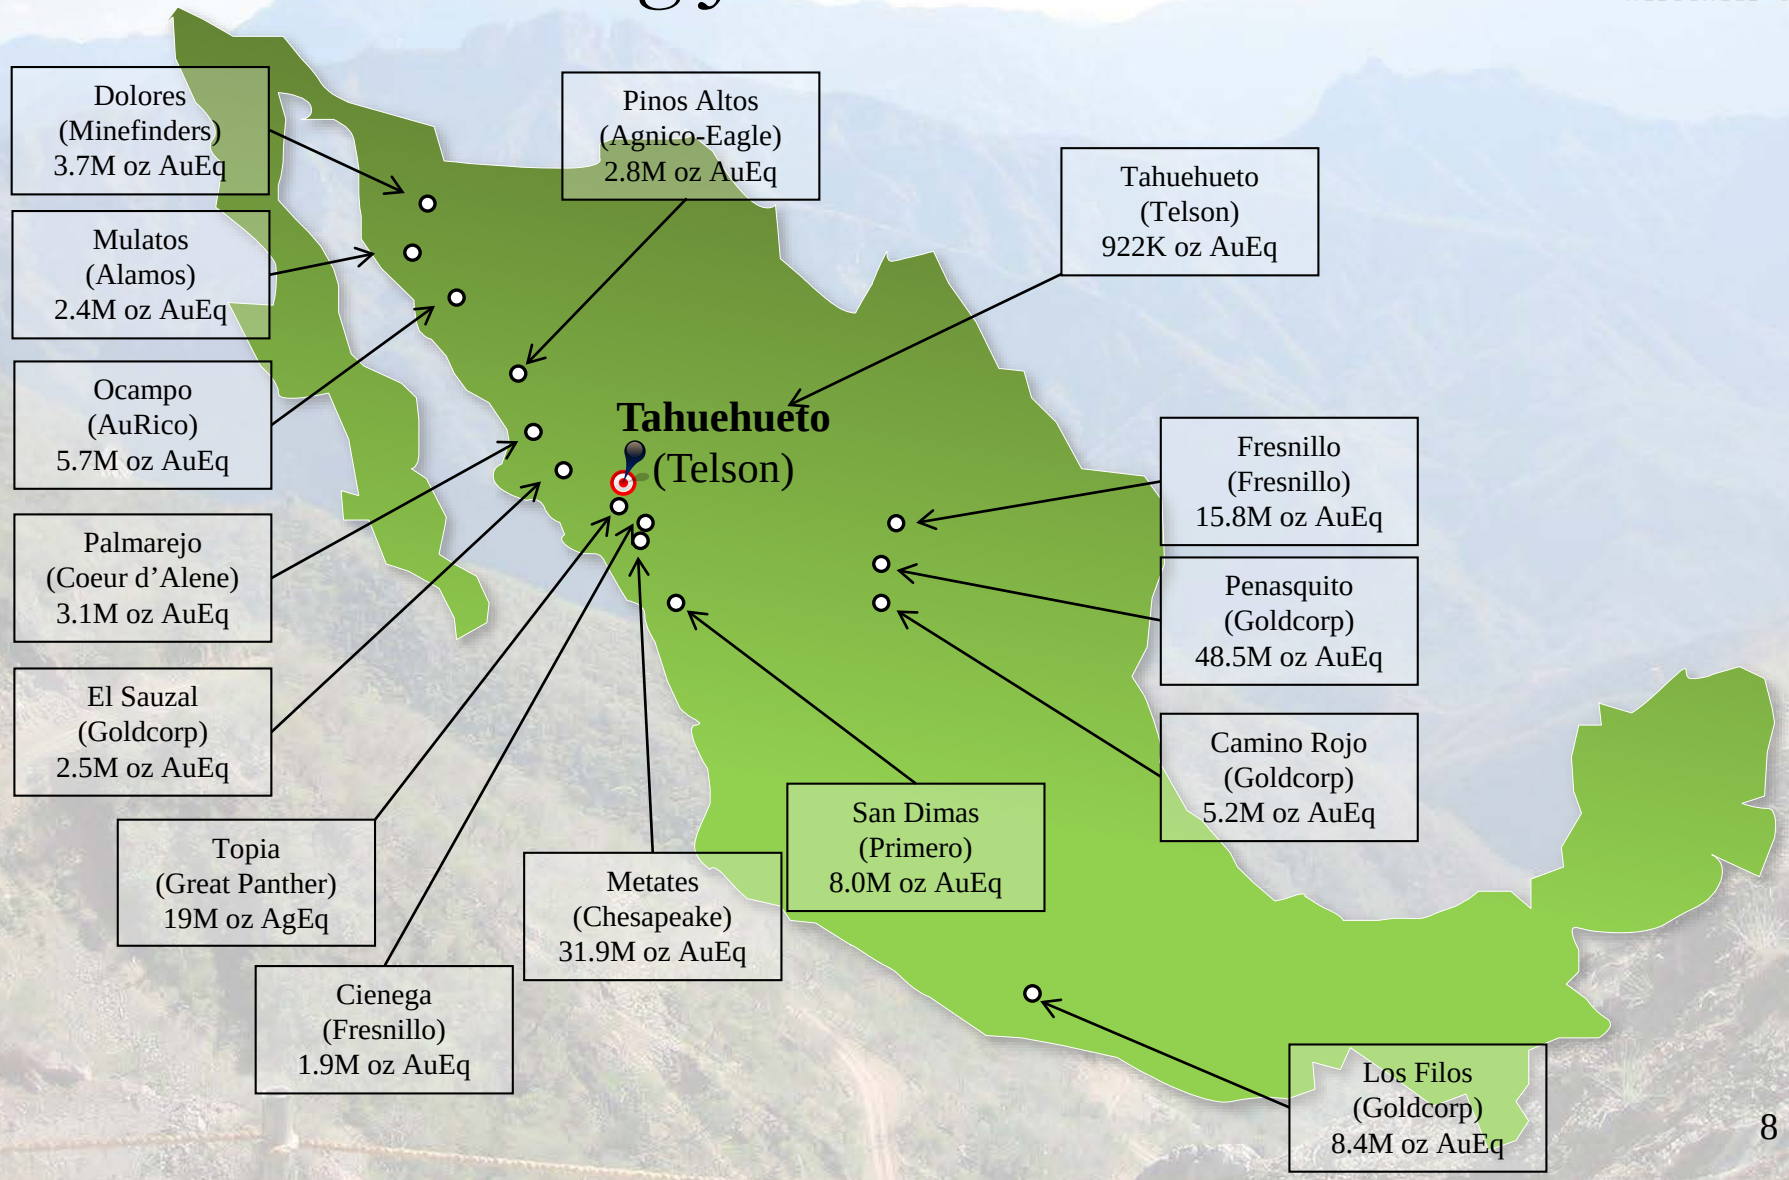

Why Mexico?

- **Very low country risk**
- Management & Board have extensive experience in Mexico
- Mexico has 500 years of mining history
- Mining industry represents a significant part of the national and state economies
- Well established permitting process
- Highly experienced mining workforce
- Stable economy & government
- Mexico has created the right conditions, entities and framework in order to promote & develop mining activity

Prolific Mining Jurisdiction

Tahuehueto Project – Durango, Mexico

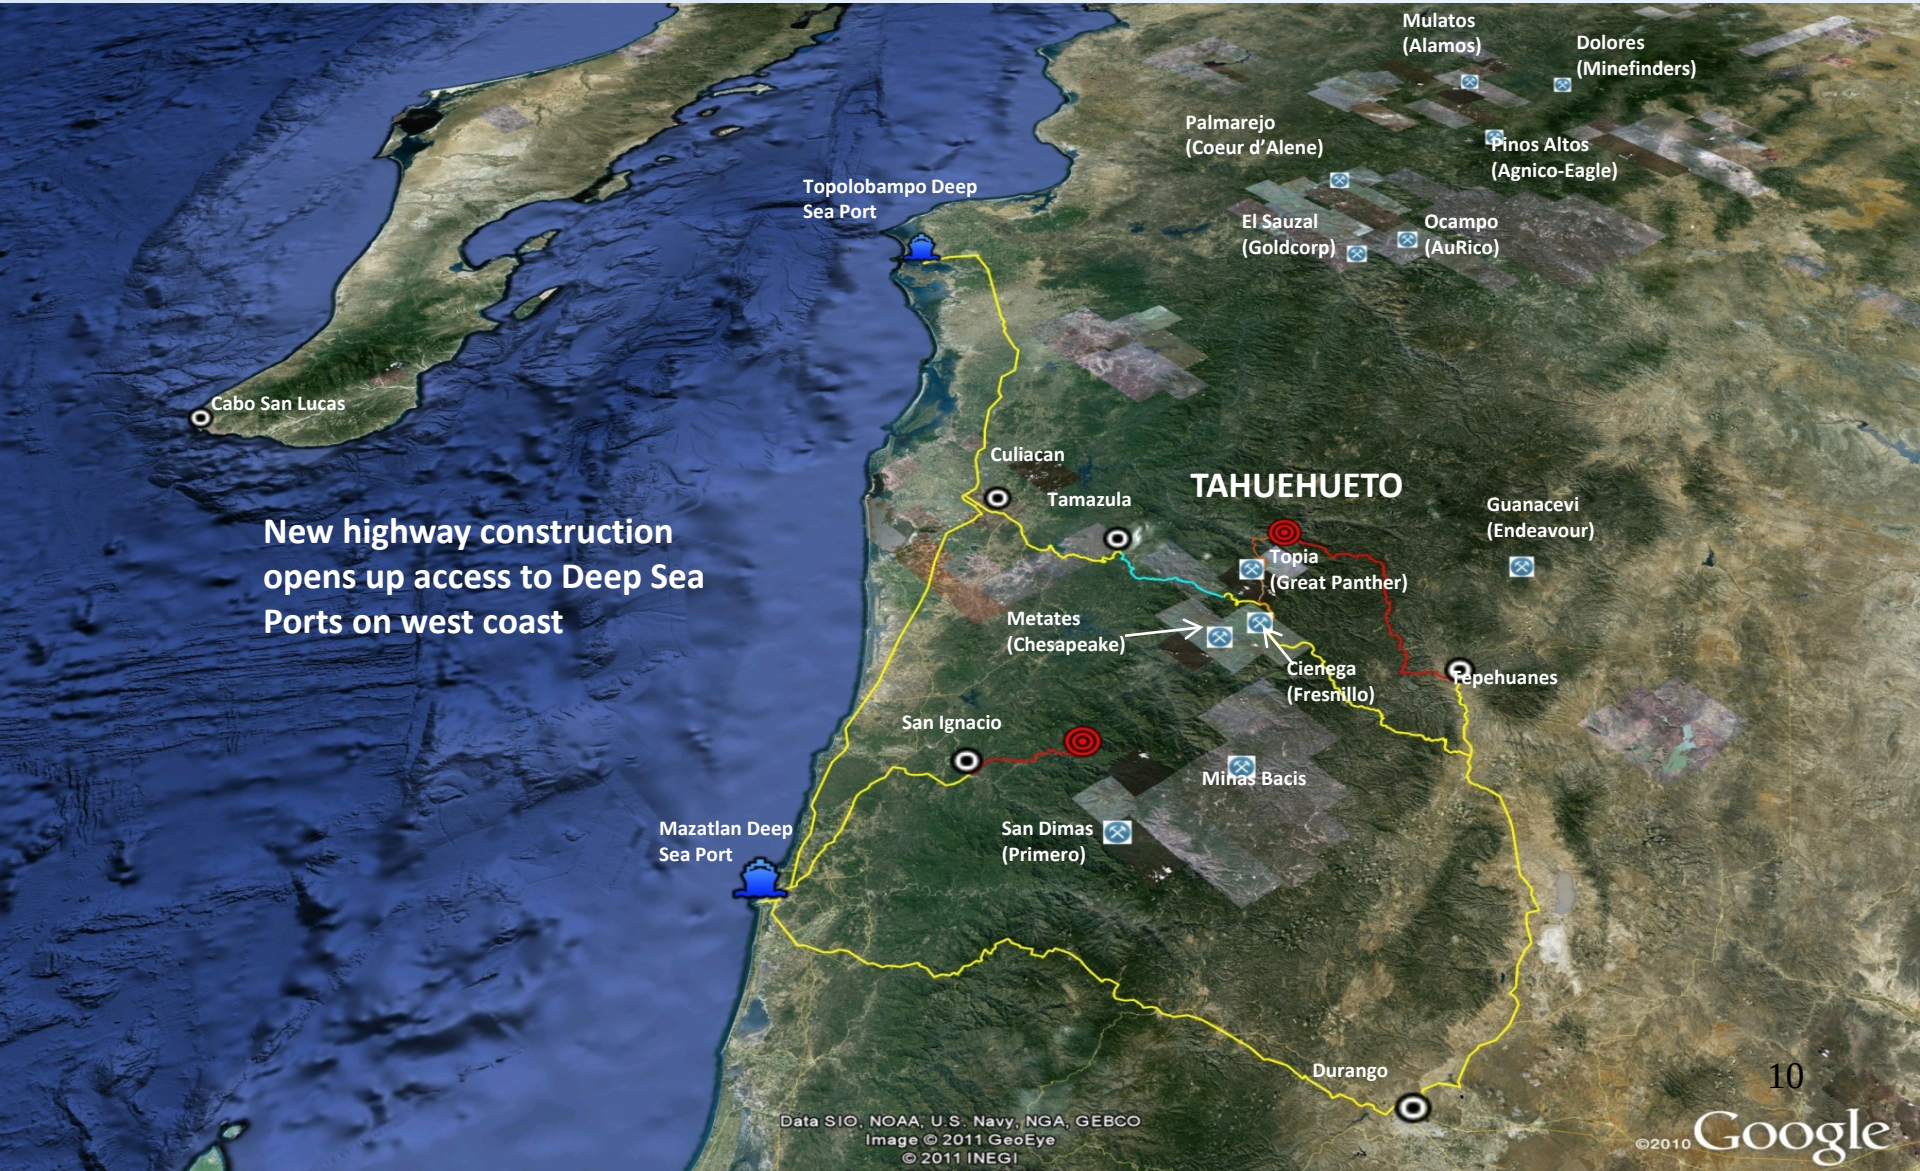

- Advanced gold, silver and base metal project
- 9,081 hectares
- 99% owned through Mexican subsidiary

Capital Costs for Mine Development

(as calculated by 2010 PEA)

Mining & Development •to prepare mine for contract miners	$US 4.2 million
Pre-Project Capital •Pre-feasibility & Full Feasibility	$US 9.5 million
Infrastructure •Power and road access	$US 21.4 million
Processing Plant •Mill construction & site infrastructure	$US 54.0 million
Total Costs	**$US 89.1 million**

"Private presentation for accredited and sophisticated investors only"

Looking Ahead at Tahuehueto

Complete Pre-Feasibility Study

GEOTECHNICAL/ENVIRONMENTAL

- Geotechnical investigation indicates open pit mining is possible at Cinco de Mayo
- Positive rock geo-mechanics supports possible open pit & underground operations
- Ongoing collection of environmental data required for mine permitting
- Infill drilling to upgrade the Inferred resource to Measured & Indicated

Resource Expansion

Prove up additional resources through continued exploration

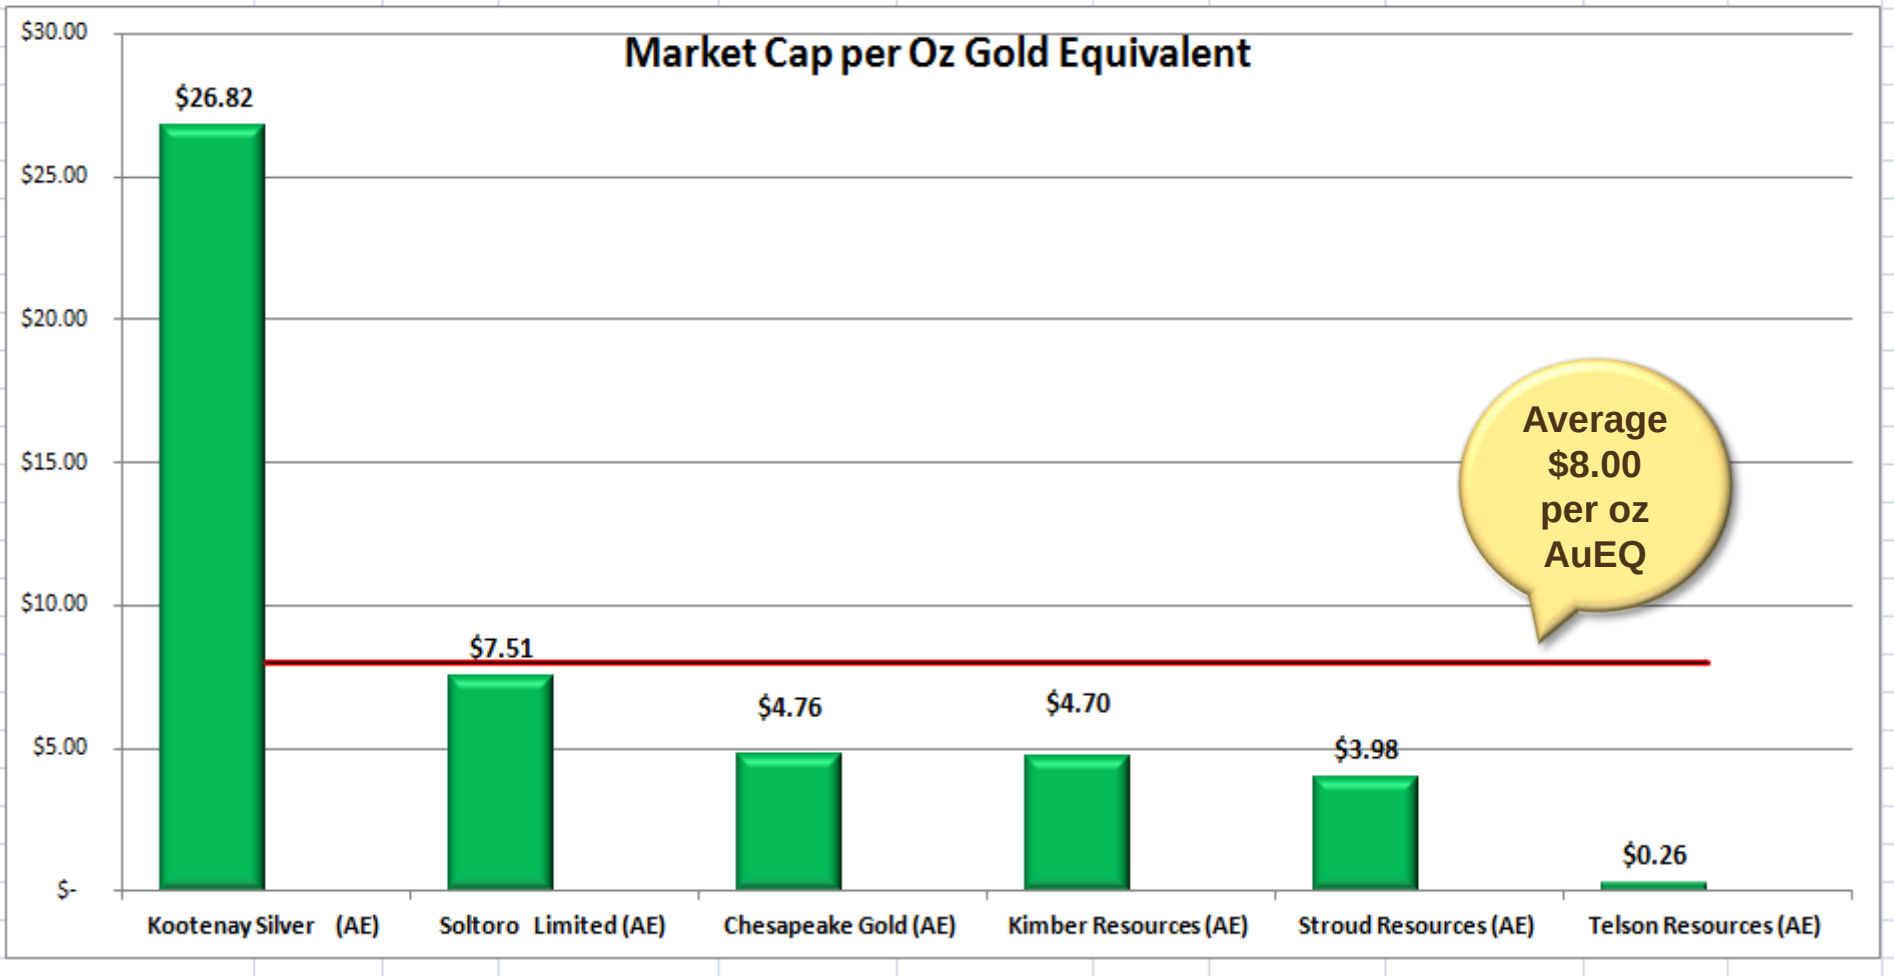

Pre-Feasibility & Operating Budget

Amount - $5,300,000

Description	Amount
Pre-Feasibility Study •Includes resource drilling, tech. data collection, planning & design, metallurgy, environment & land	$3,690,000
Property Costs •Concession taxes & payments, surface rights, exploration support	360,000
Administration •Vancouver and Durango – G&A, marketing, salaries, legal, regulatory, promotion	850,000
Other •Operation capital deficiency, accounts & loans payable, capital raise fees	400,000
	$5,300,000

5 Year Stock Chart

Comparison with TSX Global Mining Index

Investment Highlights

Low Country Risk

- Mexico is rated one of the best jurisdictions for mining investments in the world

Reasonable Exploration Risk

- Mexico ranked 1st in worldwide silver production and 4th in gold production
- Tahuehueto project is now at advanced stage (exploration risk greatly reduced)

NI 43-101 Resource Report

- Shows 878,878 gold equivalent ounces and significant base metal content

Preliminary Economic Assessment (PEA)

- Recommends the Company move forward with Tahuehueto Project

Up Trending Precious Metals Prices

Strong Long Term Outlook for Base Metals

Investment Highlights cont'd

Milestone Progress

- Progress is being achieved as Company moves from exploration to development

Market Valuation

- Attractive market valuation as Telson's market cap does not reflect the progress made during the last 24 months, despite positive PEA and NI 43-101 resource statements

Management and Board

- Extensive experience in mining development programs and evaluating resource projects

Significant Ownership

- Management & Insiders own 29% of shares outstanding

Creation of shareholder value

- Moving forward to next phases of development

Merriman Capital initiates coverage with BUY recommendation (October 2011)

APPENDIX

NI43-101 Compliance

- **Compliance with National Instrument 43-101**
  The economic assessment in the PEA is preliminary in nature and uses inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that this preliminary economic assessment will be realized. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not account for mineability, selectivity, mining loss and dilution. These mineral resource estimates include inferred mineral resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is also no certainty that these inferred mineral resources will be converted to the measured and indicated categories through further drilling, or into mineral reserves, once economic considerations are applied.

- **Qualified Persons**
  The following qualified persons, as defined in National Instrument 43-101, were involved in the preparation of the PEA and have read and approved the relevant technical portions of this document:
  - Anthony Finch, Beng, Becon, MAusIMM, Divisional Manager, Mining Engineering, Snowden Mining Industry Consultants Inc.
  - Robert Gill, B.A.Sci, P.Eng, Divisional Manager, Geotechnical Engineering, Snowden Mining Industry Consultants Inc.
  - Gary Hawthorn, B.Sc., P.Eng., Westcoast Mineral Testing
  - Scott E. Wilson, C.P.G., President, Scott E. Wilson Consulting Inc.

NI43-101 Compliance (continued)

- The mineral resource estimate for the

Cautionary Statements

- This presentation contains certain statements which may be viewed as forward-looking statements that involve risks and uncertainties. When used herein, the words “believes”, “anticipates”, “expects” and similar expressions are intended in certain circumstances, to identify forward-looking statements. Such statements are subject to a number of risks and uncertainties that could cause actual results to differ materially from those projected, including the risks of mining operations in a foreign country. Given these uncertainties, you are cautioned not to place undue reliance on such statements. There are no assurances the company can fulfill such forward-looking statements. The company also undertakes no obligation to update those forward-looking statements. Such forward-looking statements are only predictions; actual events or results may differ materially as a result of risks facing the company. Some of these risks include changes in mining methods, possibility of defects in title to mining properties, environmental regulations, lack of financing and undercapitalization, unaudited financial information prepared by management and no verification of commercial mineralized material, with further exploration necessary. All subsequent written and oral forward-looking statements attributable to the company or persons acting on its behalf are expressly qualified in their entirety by such cautionary statements. The financial information contained herein is unaudited and prepared by management and not in accordance with GAAP.

Upside exploration potential in existing resource structures and known unexplored structures could extend mine life and production levels

Sensitivity Analysis - NPV

Telson Resources Inc. – Historic Financings

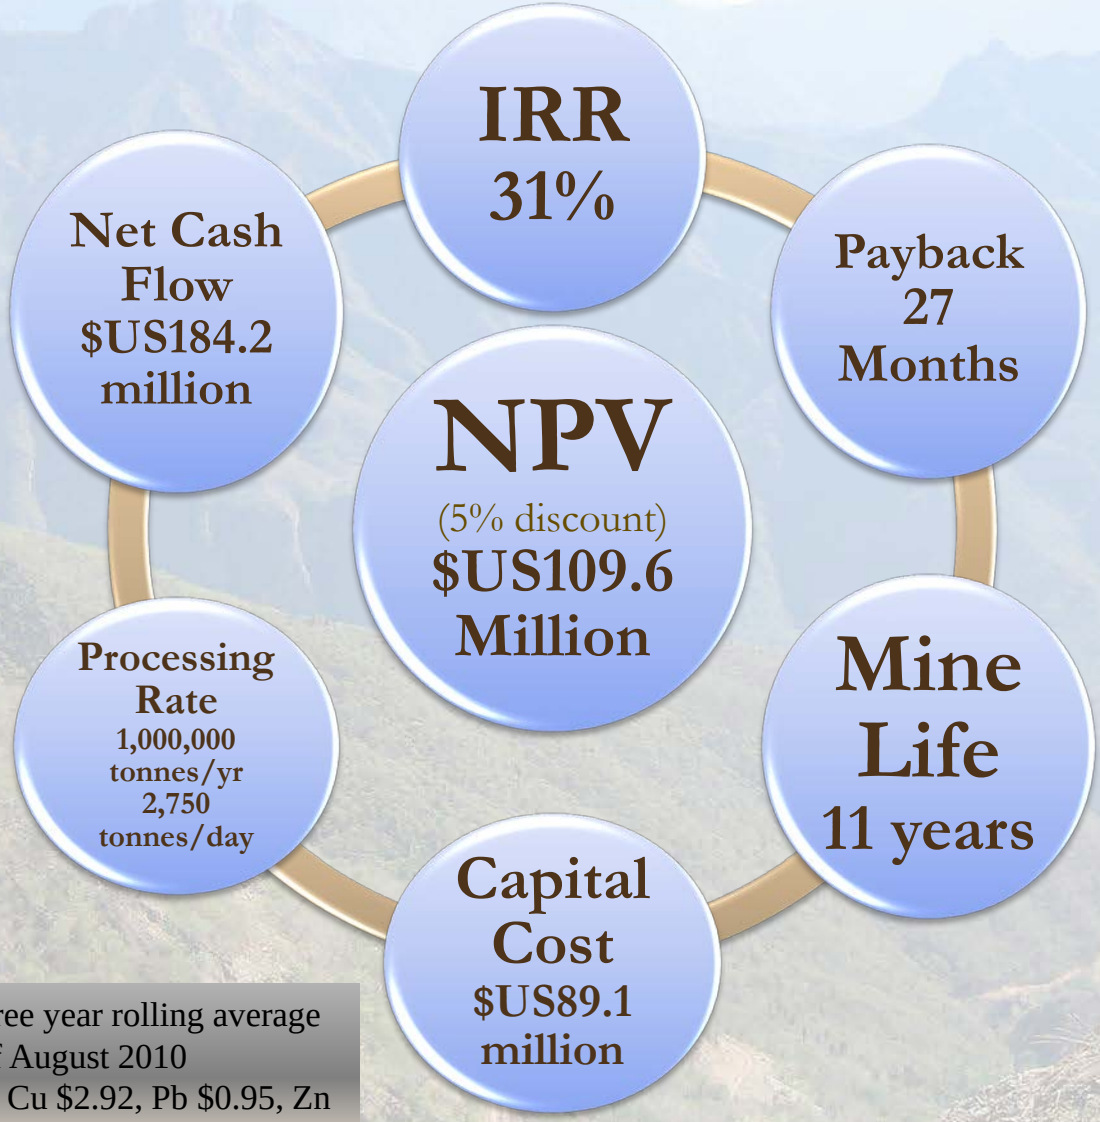

* May 16, 2006 Project attracted an investment of $4.2 million from Macquarie North America

**April 17, 2007 financing included $1,400,000 from Macquarie North America in order to maintain 9.9% ownership.

Total Financings since Tahuehueto acquisition of $26,987,050 (75% spent on exploration)

Summary of PEA Estimates

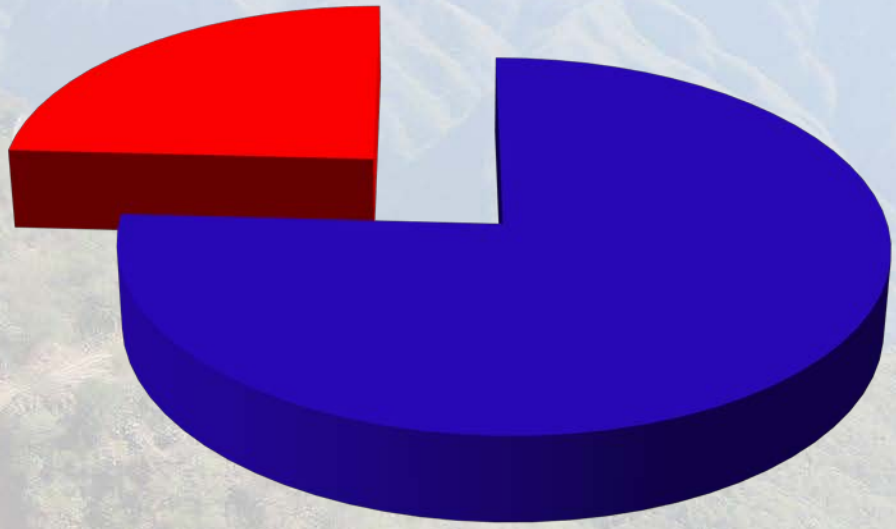

Calculations based on three year rolling average metal prices at the end of August 2010 (Au $965.81, Ag $15.38, Cu $2.92, Pb $0.95, Zn $0.88)

Estimated Value of Tahuehueto Rock

Total Estimated Value of Rock $172.00 per tonne

(Values calculated using Kitco metal prices May 27, 2014)

Potential Profit per tonne

Underground Mining & Milling Cost

Expected increase in potential profit margin with open pit mining of part of the deposit and Long Hole Open Stoping mechanized low cost underground mining
